材质：157g铜版纸，双面印刷；
尺寸：440*330mm；圆角：5mm

QUICK INSTALLATION GUIDE

PETKIT™

*Please follow the installation guide.
After installation, keep it properly for future reference.

❶ Take out **ONE** litter tray.

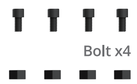

❷ Take out **ONE** bag of crystal cat litter.

❸ Take out **TWO** waste traps and **FOUR** bolt-and-nut kits.

Waste Trap x2

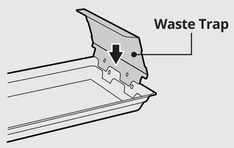

Bolt x4

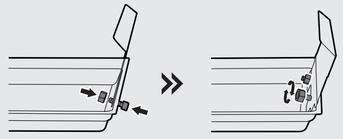

Nut x4

SET UP THE TRAY

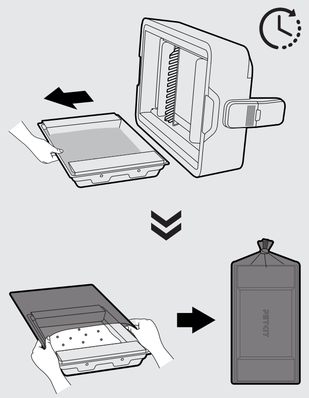

01 Place one waste trap on the inner side of the tray.

02 Insert two bolts respectively, then fix and tighten them with nuts.
Install the other waste trap in the same way.
Note: Nuts should be installed on the inner side of the tray.

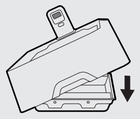

TRASH IT

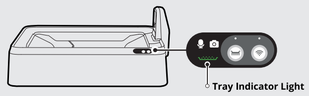

INSTALL THE TRAY

❶ Lift the main unit from the front, check the tray identification sticker to ensure it is on the same side as the camera, then push the tray in.

❷ Push the tray fully inward, then lower the main unit gently.

❸ Connect the power supply. If the tray indicator light stays solid green, the tray is installed correctly. If the indicator flashes red, the installation is incorrect. Refer to step ❶ to check the tray orientation.

❹ Pour the crystal cat litter into the tray evenly.

EXTENDING THE SERVICE LIFE OF CRYSTAL CAT LITTER

***Do not place the litter box in high-humidity areas such as bathrooms, toilets, or basements.**

- Crystal cat litter achieves odor control by absorbing moisture. Extra humidity in the air will reduce its service life.
- If the litter box is in a humid environment, use a fan or dehumidifier around it to reduce airborne moisture.
- If your cat urinates in the same spot frequently, mix the saturated crystal litter with the dry litter to redistribute it evenly.
  A diet high in crude fiber increases defecation frequency, filling the waste bin faster. We recommend feeding your cat a protein-dense, low-fiber diet instead.

SAFETY INSTRUCTIONS

***Failure to follow the safety instructions below may cause product malfunction or other unforeseen damages.**

- Install and use the product strictly following the instructions.
- Do not use crystal cat litter or litter trays from other brands or types. Using other litter trays will cause the product to become ineffective and unusable.
- Do not use any other types of cat litter, such as tofu litter or clay litter.
- Do not place the product in high-temperature or high-humidity environments, or under direct sunlight. Keep it away from fire sources.
- Keep out of reach of children.
- Prolonged exposure of cat litter in the tray will affect its water absorption and odor control. Replace it regularly.
- Dispose of the used crystal litter promptly. Do not flush into the toilet.
- Ensure good ventilation when adding or changing litter.
- Before extended holidays, ensure the litter box has sufficient cat litter and the waste bin has enough space.
